

# *Mother's Day Stepping Stone Cookie*

## **Items Needed:**

Break and Bake sugar cookies  
White frosting  
Oreo Cookies  
Skittles, M&Ms, Starburst candies  
Cookie sheet  
Microwave-safe bowl  
Parchment or wax paper  
Spoon

With a parent, preheat the oven according to the cookie package directions. Put two of the cookie pieces together and form into a ball for each stone. Bake according to cookie package directions and let cool completely. While the cookies are baking, put the Oreo cookies in a food processor or mixer and crush until the cookies are a dust-like consistency. Once the cookies have cooled, mix the cookies into some of the frosting to create a gray “stone” color. Add more frosting or cookie dust if needed. Put the frosting into a microwave-safe bowl and heat on high for 10 seconds and stir. Continue heating in 5 second increments and stirring until the frosting is thin enough to pour. Move the cookies to a piece of parchment or wax paper and pour the frosting over the cookies. Use a spoon to spread if needed. Let the cookies set for around 15 minutes. Use the candies to decorate the “stepping stones.”
